PROFILE

Experience developing web applications, backend systems, and software solutions across multiple technologies. Passionate about solving technical challenges, learning new technologies, and building reliable, scalable applications. A collaborative and adaptable developer committed to continuous learning and delivering high-quality results.

LANGUAGES

English – Advanced | **Chinese** – Intermediate

COURSES

- AWS Academy Graduate - Cloud Developing - Training Badge 
- Relational Database Administrator 
- AWS Academy Graduate - Cloud Security Foundations - Training Badge 
- CCNA: Introduction to Networks 
- Linux Essentials 
- C++ Advanced 
- AWS Academy Graduate - Cloud Foundations - Training Badge 

AWARDS & RECOGNITIONS

Junior Research Projects Workshop – Participant
19/05/2026

Third Place – FEPRO Advanced Applications
06/09/2024

Talent Hackathon – Participant
02/04/2023

EDUCATION

BUAP

Bachelor's Degree in Computer Science Engineering
08/2021 – 06/2026 | Puebla

PROFESSIONAL EXPERIENCE

Ourhit

Web Developer

12/2025 | Puebla

- Developed and customized informational and e-commerce WordPress websites for institutional clients.
- Implemented backend features using PHP and MySQL.
- Optimized website performance, usability, and responsive design.

Buap FCC

Website Maintenance

05/2025 – 11/2025 | Puebla

- Maintained and updated institutional websites using HTML and CSS.
- Implemented content enhancements and UI improvements to existing web pages.
- Ensured website functionality, usability, and design consistency across multiple pages.

SELECTED PROJECTS

Intrusion Detection System

IoT Security – PHP, Kotlin, C++ (ESP32)

- Developed an IoT-based intrusion detection system integrating ESP32 sensors, a PHP backend, and a Kotlin mobile application.
- Implemented real-time activity monitoring and push notifications using Firebase services.
- Built features for activity logging and intrusion management, combining hardware integration with backend and mobile development.

Second Place – Guerra de Dioses Competition

17/10/2022

TECHNICAL SKILLS

Programming Languages

PHP, C#, JavaScript, C++, Python, Java, HTML, Shell

Web Frameworks & Platforms

Laravel, Node.js, WordPress, Hostinger, .NET, GitHub, Entity Framework

Databases

SQL, MySQL, PostgreSQL, Oracle DB

Libraries

React, TensorFlow, OpenTK (OpenGL), PHPmailer, Prisma

Tools & Hardware

Git, ESP32 (IoT), Arduino

Operating Systems

Windows, Linux Distributions (Ubuntu, Manjaro)

Eco Recicla

Recycling Platform – TensorFlow & React

- Developed a web platform that automatically classifies waste using a TensorFlow machine learning model.
- Implemented a gamification system that rewards users with redeemable points to encourage sustainable recycling habits.

3D Model Visualization and Collision

Detection System

Object-Oriented Programming – C# & OpenTK (OpenGL)

- Developed a 3D graphics application for loading and rendering PLY models using OpenTK.
- Implemented Octree-based collision detection between a moving sphere and complex 3D models.
- Built real-time rendering features, including hitbox visualization and multiple camera perspectives.

Library Management System

Web Application – PHP, SQL, JavaScript

- Developed a library management system with full CRUD functionality for books and loan records.
- Implemented role-based features for administrators and users, including loan requests and book registration.
- Designed and integrated a SQL database to manage books, users, and lending operations.

Survey Platform

Web Application – PHP

- Developed a web platform for creating and distributing custom surveys through WhatsApp groups.
- Implemented scheduled survey expiration with automated report generation and email delivery.
- Designed backend functionality to manage survey responses and streamline result processing.

School Schedule Generator

Web Application – React & Node.js

- Developed a web application that generates optimized class schedules based on official course offerings and user preferences.
- Implemented PDF parsing and data processing using Node.js to extract and organize course information.
- Built an interactive React interface for course selection and schedule generation.
