

DANIEL CISNEROS ROJAS

Computer Science Engineer | Full Stack & Backend Developer

+52 222 470 8123 danielcisnerosrojas01@gmail.com linkedin.com/in/daniel-cisneros-rojas github.com/Daniel-Cisneros-Rojas

PROFESSIONAL SUMMARY

Software Developer experienced in web applications, backend systems, and full-stack solutions using modern technologies. Recognized for strong adaptability, teamwork skills, and a dedication to continuous learning to drive technical value in professional engineering environments.

PROFESSIONAL EXPERIENCE

Web Developer 12/2025 – 06/2026
Mipro Puebla, Mexico

- Developed and customized corporate and e-commerce websites utilizing WordPress.
- Implemented backend features and database management using PHP and MySQL.
- Optimized website performance, user experience (UX), and responsive layouts.

Website Maintenance Specialist 05/2025 – 11/2025
BUAP - Faculty of Computer Science Puebla, Mexico

- Maintained and updated institutional academic websites using HTML and CSS.
- Implemented UI enhancements and updated content across multiple faculty web portals.
- Ensured cross-browser functionality, accessibility, and visual consistency.

FEATURED PROJECTS

Intrusion Detection System
PHP, Kotlin, ESP32, Firebase

- Developed an IoT intrusion monitoring system integrated with ESP32 hardware sensors.
- Implemented real-time push notifications using Firebase.
- Integrated hardware, cloud backend, and mobile app for live activity logging.

Smart Recycling Platform
React, TensorFlow

- Built a web application for automated waste classification using TensorFlow machine learning.
- Integrated real-time image recognition for automatic material sorting.
- Implemented a gamified user reward system to incentivize recycling.

3D Visualization & Collision System
C#, OpenTK, OpenGL

- Developed a desktop application for loading and rendering 3D PLY mesh models.
- Implemented real-time collision detection using spatial Octree subdivision.
- Featured real-time rendering, hitbox visualization, and dynamic multi-camera navigation.

TECHNICAL SKILLS

LANGUAGES
PHP, C#, JavaScript, C++, Python, Java, HTML, Shell, SQL

FRAMEWORKS & LIBRARIES
Laravel, Node.js, React, .NET, Prisma, WordPress

DATABASES
MySQL, PostgreSQL, Oracle DB

TOOLS & PLATFORMS
Git, AWS Cloud, Firebase, Postman, Linux, ESP32

EDUCATION

B.S. in Computer Science
Graduated / Titulado
BUAP (Puebla, MX)
08/2021 – 07/2026

CERTIFICATIONS

- AWS Academy Graduate** - Cloud Developing
- AWS Academy Graduate** - Cloud Security Foundations
- AWS Academy Graduate** - Cloud Foundations
- CCNA**: Introduction to Networks
- Relational Database Administrator
- C++ Advanced
- Linux Essentials

LANGUAGES

English: Advanced / Fluent
Chinese: Intermediate
Spanish: Native

HONORS & HACKATHONS

3rd Place - FEPRO Advanced Applications
09/2024

Junior Research Workshop
05/2026

School Schedule Generator

React, Node.js

- Created a web app generating optimal course schedules based on official course catalogs.
- Engineered PDF parsing scripts with Node.js to extract course offerings.
- Built an interactive React UI for schedule customization and overlap checking.

Talent Hackathon Participant

04/2023
